

Digital Operations: It's a NEW DAY

There are **MORE** interconnected devices than people in the world!

To service the customers, huge investments have been made to instrument all the technology silos:

- Core network
- Application compute
- Data storage
- OSS infrastructure

This increased investment has resulted in **RICH DATA!**

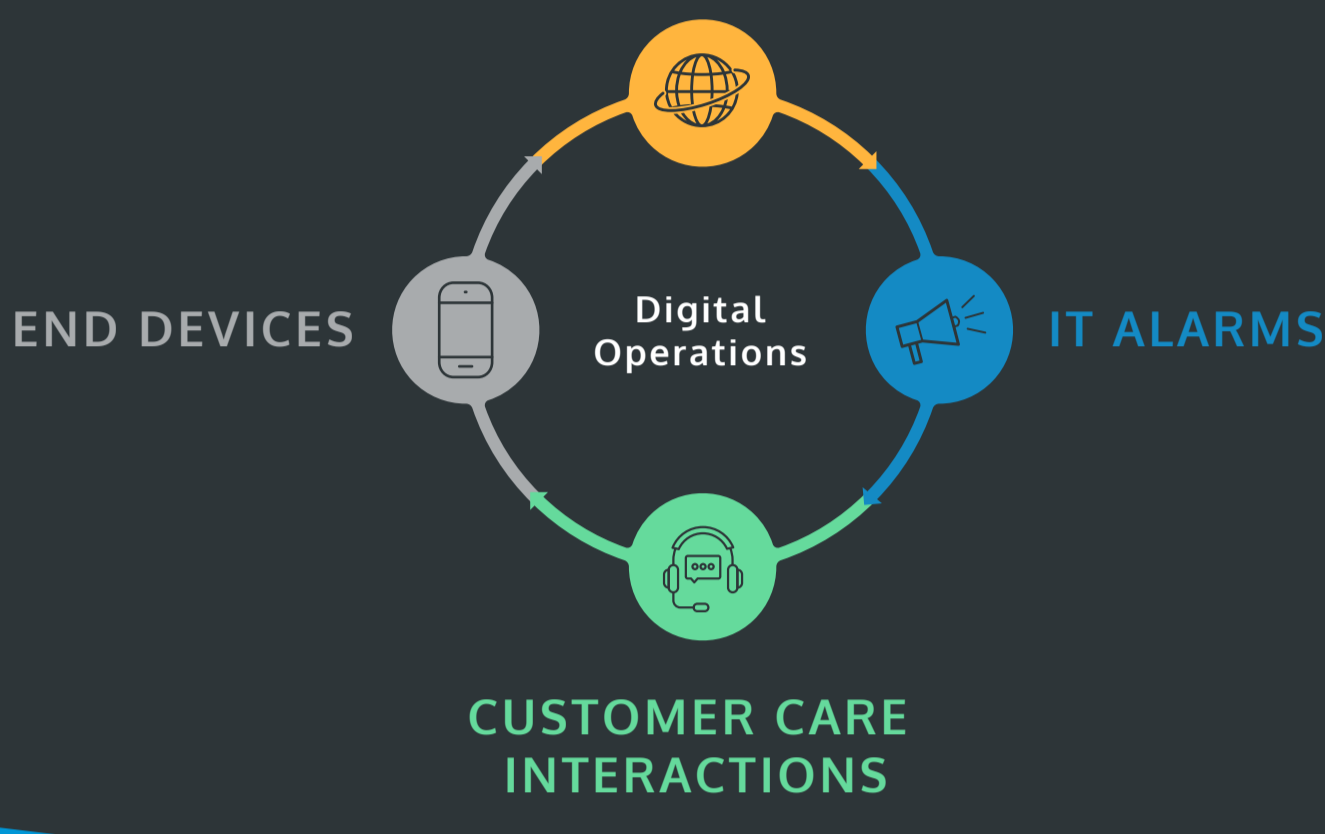

To mine the value of the **DATA, OPERATIONS** needs to remove the barriers between the silos and process all the data in real time to

VISUALIZE, ANALYZE AND ACT

Digital Operations leverages all the **DATA** in real time - analyzing and correlating across the silos to create

INSIGHTS, ACTIONS AND COMMUNICATION

NETWORK TELEMETRY

VIA provides **Agile Digital Operations** for the modern enterprise

VIA Solution Templates are pre-assembled artifacts:

- Agnostic collection interfaces
- Applied AI
- Pre-built data curation and schema
- Intuitive GUI
- Workflow automation functions

Solution Templates are configured or extended by customer developers, systems integrators or Vitria field team

The **VALUE** of Digital Operations

By employing AI and machine learning, VIA enables operations to quickly

REACT to PROBLEMS

PREVENT PROBLEMS

And most important

PREDICT PROBLEMS in the future

Six Dimensions of Digital Operations
